# Simplify repo client order management

Anvil OMS equips you to digitalize all your repo orders and manage them in one system. You can:

- Have your incoming requests automatically converted to digital orders and managed in one screen.

- Reply with best prices and execute trades at a single click, in the same screen. Get advanced analytics showing what you're trading and who you're trading with.

- Take full control of your workflow.

Repo client order management is fast becoming digitalized. As new markets open and competition for liquidity intensifies, repo desks are at risk of information overload. Relying on a mixture of poorly integrated solutions to manage requests from multiple sources — email, chat, and electronic RFQs – is complex and inefficient.

ION's integrated order management solution (OMS) transforms this complexity into simplicity.

The ION way

All client requests and responses in 1 screen

Consolidate decision making

- Multi-channel sales to trader workflow
- RFQ management
- Inventory and availability

- Market data
- Pricing
- Market risk
- Balance sheet
- Client behavior

Trade execution and lifecycle management

Get all the data you need in one place

- Get instant access to all the major repo venues around the world.

- Manage your client flow across all channels in a single screen: email, chat and electronic RFQs.

- Automated processing of incoming client and outgoing locate requests.
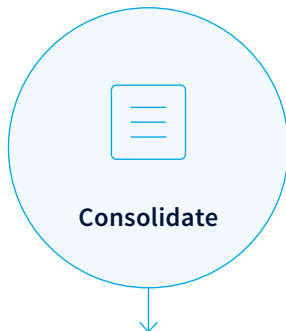

Make your best decisions

- Empower traders with the data they need to respond quickly to your clients: position, risk pricing, balance sheet.

- Automate your pricing decisions, check real time market data and perform compliance checks.

- See all order history across your desk to analyze client behavior and tailor your strategy according to changing market conditions.

Automate your manual processes

- Build a clear sales-to-trader workflow and keep a record of every negotiation step.

- Configure automated responses and route orders across your business, based on your rules.

- Process your execution and lifecycle events seamlessly,

Free your business to grow

- Reduce technology costs with our hosted solution.

- Stay up-to-date as we take support and maintain your platform.
