

# ION GTP Low Touch service

## Automate your high-touch order workflows

If your cleared derivatives business is relying on manual processes to execute complex orders, your business cannot grow.

You need advanced technology to offer your customers the sophisticated bespoke services they need, and scale your business without increasing your costs.

The ION GTP Low Touch service can transform even the most complex high-touch orders and execution strategies into automated low-touch.

### Transform high-touch into low-touch

- Transform high-touch workflows into fully automated low-touch.
- Create customer-specific rules so orders target the right execution strategy.
- Take manual control when necessary to adjust order parameters in real time.

### Create a solution for your specific needs

- Build and deploy bespoke order types and execution strategies.
- Easily combine algos from different brokers, and chain algos together to build event-driven strategies.
- Provide strategies that your customers can use for themselves.

### Understand your performance

- Monitor your orders in real time, get instant alerts for outliers, and enable your desks to analyze their own efficiency.
- Get performance scores to track your orders against their goals.
- Create snapshot reports and share them with your customers.

### Free your business to grow

- Maximize your FIX and execution capacity with automation.
- Spend less time troubleshooting issues and outliers.
- Focus on serving your customers and building your business.

#### Automation

Simplify the connectivity requirements for your clients.

#### Innovation

Achieve best execution by splitting orders across the most advanced algos.

#### Collaboration

Support your clients' bespoke trading strategies.

Our cleared derivatives solutions automate your complete trade lifecycle and deliver actionable insights, whenever and wherever you need them.
