

ION GTP Multi-broker Workstation

Complete execution management in one solution

Finding the right derivatives trading platform can be a challenge. The need to trade with many brokers using a wide range of complex execution strategies often forces trading firms to use multiple platforms. That means higher costs, increased risk, and a fragmented view of your business.

The ION GTP Multi-broker Workstation lets you execute orders across all your brokers using a suite of advanced trading tools, backed by a global community of sell-side firms, all in a single solution.

A single platform solution means lower costs, a consolidated view of risk and a better understanding of your overall business.

Get everything you need in one solution

- Manage execution using a single order blotter that provides a complete view of all your orders.
- Execute trades using advanced order types and benchmark algos.
- Monitor your execution performance using advanced analytics.

Use intelligent order execution

- Execute your orders using an extensive range of broker-specific algos.
- Perform cross-exchange arbitrage and hedging using our spread trading tool.
- Customize your order templates to easily execute even your most complex orders.

Enjoy complete integration

- Get your orders, trades, and allocations using a real-time feed.
- Use the Excel API to stage orders from an internal source.

Execute anywhere at any time

- Connect to global markets using direct memberships or a vast network of certified executing brokers.
- Access a wide range of exchanges with comprehensive functionality, including RFQ and option strategy creation.
- Report your voice brokered trades without the need for exchange GUIs.

Manage your orders effectively

- Partition users, desks, and workflows using a shared global order book.
- Split any size order across multiple execution services and brokers.
- Easily hand over orders between desks while maintaining queue position.

Take complete control of your business

- Control which markets and execution features your traders have access to.
- Manage your pre-trade risk independent of the executing broker.

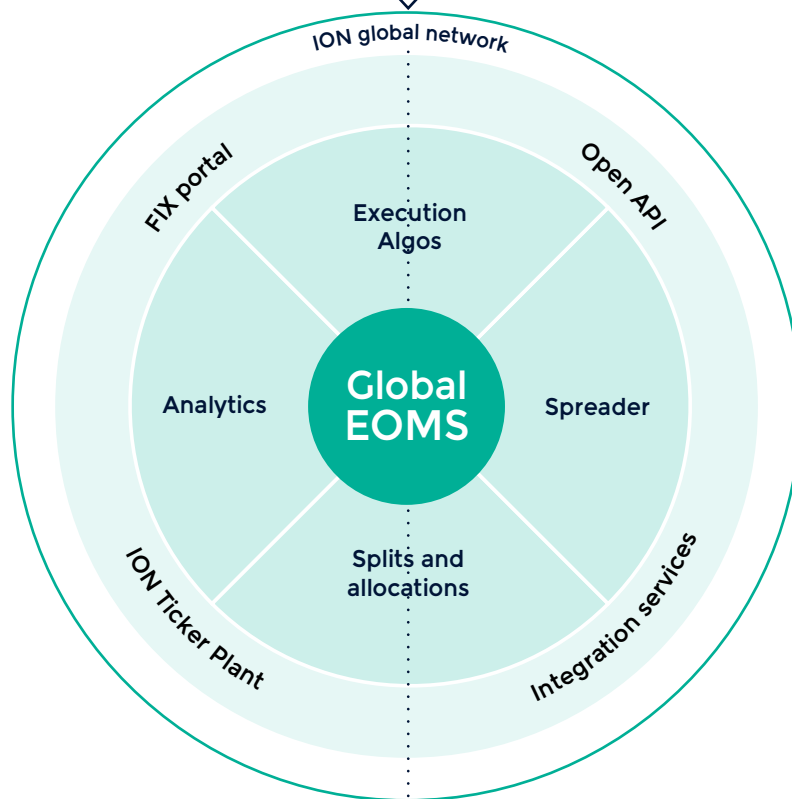

Trading workstation
GTP GUI
3,000+
