

Fidessa

Algo Development Infrastructure (ADI)

Simplifying algo development

ION's Algo Development Infrastructure will differentiate your business by adding your IP to a stable, industry-proven infrastructure. With ION's Algo, you can focus on the algorithms and the clients using them while we manage everything else— co-location, integration, compliance, market data, market access and more.

- Java framework with example source code to get started immediately
- Market simulator for testing
- Simplified XML dialogue builder
- multithreaded transaction engine
- Operation through the 24-hour market required for futures and options trading
- Full integration with Fidessa platforms
- Monitor orders from a single interface
- Integrated analysis tools

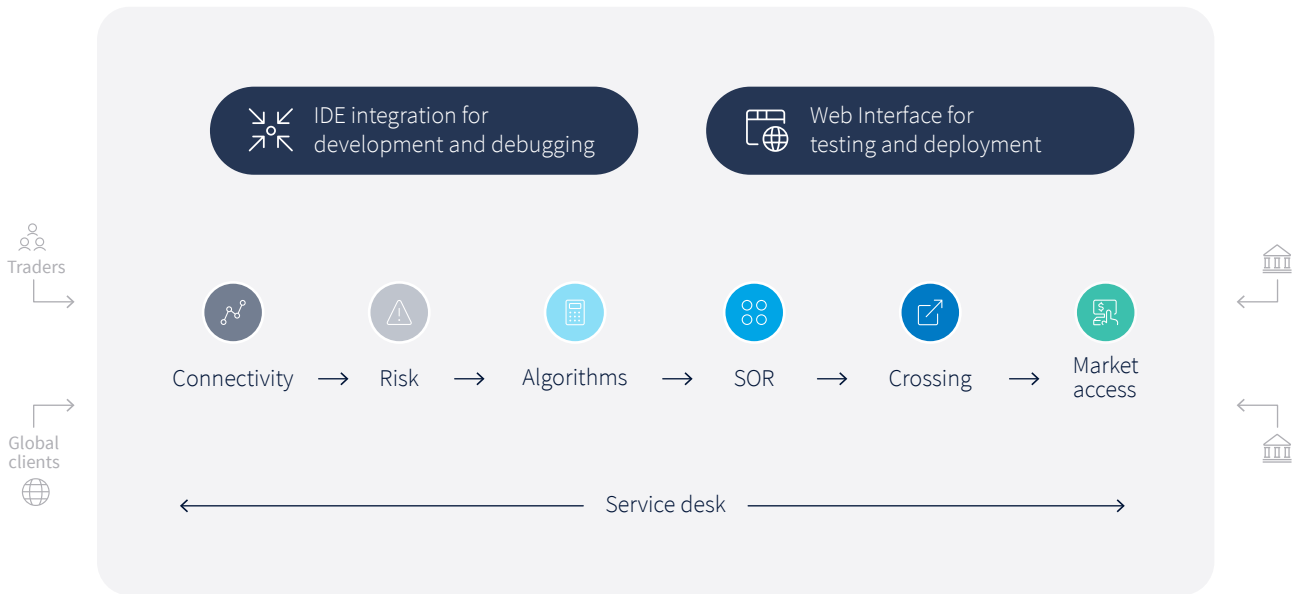

Success in today's automated trading environment demands that brokers adapt and respond to individual clients through changing market conditions across asset classes and global markets.

ION's Algo Development Infrastructure delivers the freedom to develop, test, deploy and monitor custom algorithms at the pace of business, without the distractions and costs driven by compliance, regulation, and markets.

Key features:

- Work from your existing IDE
- Develop concurrently with multiple developers
- Integrate your analytics engine with API
- Integrate your analytics engine and your platform through the API
- Monitor from a single interface
- Get alerted to focus on orders requiring attention
- View order analytics in real time View real-time order analytics
