XTP Spark

Back-office technology enabling operational efficiency via process automation

As an operations leader in your firm, you want a reliable, stable back-office system that removes time-consuming tasks, and delivers accurate results the first time and every time.

XTP Spark is an out-of-the-box, all-in-one automated workflow solution that enables your back-office team to deliver on your business goals.
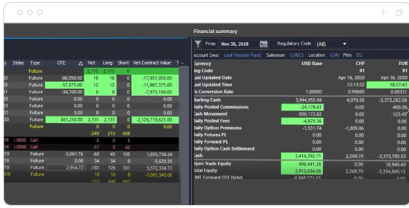

- Streamlines and automates workflows to optimize business processes and improve customer service.

- Installs quickly, and is easy to understand and use.

- Enables easy extraction and manipulation of data to create detailed reports quickly.

- Unlocking potential to handle more clients without needing additional headcount.

XTP Spark is an ideal back-office solution for banks and brokers, commodity trading firms, and niche clearers who require fast, efficient, and accurate functionality that satisfies all regulatory and exchange requirements.
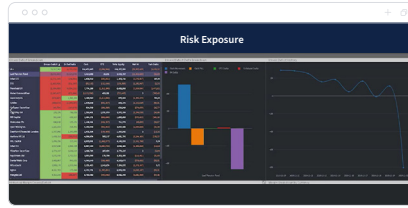

Transforming complexity into simplicity, XTP Spark gives your back-office everything they need to work efficiently and provide excellent customer service:

- Streamlined and accelerated back-office workflows featuring automating processes within a robust control framework, eliminating manual steps.

- Capacity to process large trade volumes at high STP rates.

- Instant visibility of client activity, highlighting business opportunities.
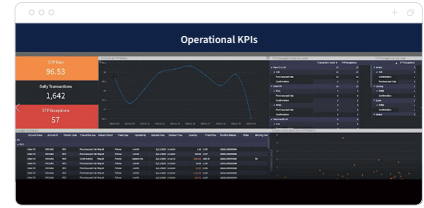

XTP Spark enables your back-office team through:

Real-time clearing, allocations, settlement and reporting

Instand visibility of client activity and exposure

Smart trade processing analytics

Quick to implement, ready to use, and reliable, XTP Spark is built on proven, reliable technology:

- Easy to understand and intuitive to use
- Runs continuously in real time, 24 hours a day with no downtime.
- Connects readily to your existing systems using our flexible integration tools.

ION's partnership approach, built on continuous innovation and collaboration, ensures the platform will keep pace with changing demands as your business grows and evolves. Our focus on improving efficiency and operational effectiveness helps you and your business to succeed.

Address the needs of other stakeholders across your organization

For technology leads:

- Integrates easily into your tech stack and architecture.
- Uses robust, proven, and fully supported methodology that minimizes additional resource requirements on your side.
- Follows a predictable step-by-step installation timeline.

For business decision makers:

- Providing everything your back-office team needs to work efficiently.
- Reducing TCO, enabling profitable expansion.
- Provides ready access to advanced analytics for client profiling.

⊕ Equipping your back-office team to perform efficient and accurate clearing, settlement, and reporting in real time – together providing excellent customer service.
