

ION Fidessa platform

Unify and simplify your equities trading business

Equities trading is more complex than ever. To grow your business, you need technology that can unify your operations, simplify your workflows, and boost your efficiency.

Whether you're a boutique broker or a global bank, Fidessa gives you everything you need for equities trading in one, integrated solution.

Connect to markets worldwide

- Get instant access to more than 6,500 buy-sides and 600 brokers.
- Execute orders on more than 200 markets.
- Integrate your platform with your choice from a range of dozens of clearing brokers and third-party systems.

Sophisticated order management

- Automate your orders using algorithms, smart order routing, and pairs trading.
- Manage even the most complex workflows — from high to low-touch, single stock to programs and ETFs, and from listed equities to swaps.
- Hedge using FX, ETFs, and derivatives.

Do everything you need in one platform

- Manage your global order book, trading, and risk in one screen.
- Run your institutional, systematic, private wealth, and retail businesses on one platform.
- Get a built-in middle office for seamless straight-through processing.

Automate and simplify your workflows

- Offer your customers high-touch quality of service at low-touch cost.
- Build customized workflows quickly and safely with our Automation Engine.
- Integrate your own business intelligence using our real-time APIs.

The top choice for sell-side institutions around the world

Over 200 Fidessa platforms transacting more than \$22 trillion USD per year
